

# DANIEL SCHOSSER

Leadership, Project Management & Software Development

## Professional Statement

As a seasoned team leader with nearly two decades of experience, I specialize in planning, managing, and delivering complex software projects. I co-founded a startup that was successfully acquired, led a company through both an acquisition and a full-stack modernization, and built a platform with over 25,000 users - which I later sold. With a strong emphasis on security, scalability, and meaningful results, I turn ideas into impactful products and lead teams to consistently exceed expectations.

## Programming

## Languages

## Knowledge

### Technologies

AWS, GCP, Kubernetes, Docker, Serverless, Terraform, Hashicorp Vault, Queues, Caching, MySQL, NoSQL, Microservices, APIs, REST, GraphQL, Git, Github Actions, Datadog, Sentry

### Frameworks

Gin, Gorilla, Laravel, Lumen, Symfony, PHPUnit, Zend, Vue, Cypress, React, Tailwind CSS, Stripe, Adyen, Storyblok

### Concepts

DevSecOps, DevOps, IT Security, Clean Code, Unit & Integration Testing, TDD, Scrum, Kanban

### Software

Photoshop, Blender, Davinci Resolve, Notion, VS Code, IntelliJ IDEA, Slack, Teams, Atlassian Suite

## Work Experiences

06/2025 - Present

**Airalo (AirGSM Pte. Ltd.)** // Engineering Manager

- Managed a team of 10 engineers, spanning frontend, backend, and mobile development

04/2022 - 01/2025

**Juniqe GmbH (mypooster Group)** // CTO

- Designing and conceiving a new marketplace business model
- Ensuring smooth operations of a legacy shop system
- Led a team of up to 16 developers, DevOps engineers, and BI analysts
- Managed communication between engineering and business units
- Aligned business vision and engineering goals with C - Level positions

**Techstack** Golang, PHP, Symfony, Zend Framework, Vue 3, SQL, Adyen, Github Actions, AWS, Atlassian Suite, Clickup, Gitlab, Scala, Commercetools, Magento, Looker, Matillion, GCP, Checkout.com, Git

01/2021 - 01/2025

**mypooster GmbH** // Teamlead Software Engineering & Techlead DevOps

- Leading a team of up to 13 developers and DevOps engineers
- Managed project development using PHP and Golang
- Oversaw communication between engineering and BI teams

**Techstack** Golang, PHP, Symfony, Zend Framework, SQL, Vue 3, Adyen, Github Actions, AWS, Atlassian Suite, Git

02/2017 - 12/2020

**Crashtest Security GmbH** // Co-Founder & Head of Development

**EXIT: Sold to Veracode in 2022**

- Developed a fully automated security scanner for web and JavaScript applications, as well as APIs.
- Managing and reviewing the backend engineers
- Planning and developing backend microservices
- Implementing all payment related processes
- Managing the Database and Kubernetes infrastructure
- Workshops and Presentations regarding IT Security Topics
- Handling technical support requests and customer interactions
- Managing HR and Recruitment

**Techstack** Golang, PHP, Kubernetes, AWS, GCP, Hashicorp Vault, Atlassian Suite, SQL, NoSQL, Stripe

04/2015 - 02/2017

**Janosch Maier, Daniel Schosser, René Milzarek GbR** // Co-Founder

- Developed a fully automated security scanner for web and JavaScript applications, as well as APIs.

02/2016 - 12/2016

**mypooster GmbH** // Senior Software Developer

- Extending the functionality of the online shop
- Development of an automated image generating media library
- Integration of external services in the production lines
- Integrating hardware machinery interfaces into the production cycles

**Techstack** PHP, Zend Framework, SQL, Teamcity
